Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted full registration to technical grade mesosulfuron-methyl and the end-use product Silverado WDG Herbicide for use in Canada on wheat. The specific use approved in Canada is detailed on the label of Silverado WDG Herbicide, *Pest Control Products Act* Registration Number 29707.

Corresponding MRLs were proposed in the consultation document published on 28 January 2010, Proposed Registration Decision PRD2010-01, *Mesosulfuron-methyl*. Additional poultry MRLs were proposed in the consultation document published on 16 November 2010, Proposed Maximum Residue Limit PMRL2010-52, *Mesosulfuron-methyl*. The PMRA received no MRL related comments in response to these consultations.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs for mesosulfuron-methyl take legal effect as of the publication date of this document.

Established Maximum Residue Limits for Mesosulfuron-methyl

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Mesosulfuron-methyl	methyl 2-[[[[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonyl] amino]sulfonyl]-4-[[(methylsulfonyl)amino]methyl] benzoate	0.1	Wheat germ
		0.03	Wheat
		0.01	Eggs, fat, meat and meat byproducts of cattle, goats, hogs, horses, poultry and sheep, milk

A complete list of all pesticide MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides Web page in the Pesticides and Pest Management section of Health Canada's Web site.
